Tool Status: May 24 2000

l3tCalUnpTool

- No significant changes. Still works.

unpack_reco

- Packer is able to generate RawDataChunks for multiple systems (CAL_FE, SMT_FE, MUO_FE, though MUO_FE is currently busted).
- Has the ability to update an old RDC with new information (largely untested). (v00-03-05)
- `docs at: http://annwm.lbl.gov/~leggett/D0/rawdata.html`

run_config_mgr

- trying to get l3run_config to pass itest on NT. Installing D0 NT environment via VMWare.
